

An Industry Brief
Modular Computing Brief Series 2005

High Performance Computing

www.imexresearch.com

High Performance Computing

T A B L E O F C O N T E N T S

1. IT - Industry

WW IT Spending	11
Data Center IT Needs	11
Data Center Management – MIS Efforts Spent	11

2. Applications

Market Overview	12
Data Center – Workload Distribution 2005	12
Rise of Industry Standards Servers	13
Computer Architectures - Scale-Up vs. Scale-Out	13
Market Segmentation	14
Market Segmentation by 3 Tier Computing	14
Tier-1 Edge Computing	15
Tier 2 Application Servers	15
Tier-3 Back End Data Base Servers.....	15
Product Requirements by Tiers-1, -2 & -3 Computing.....	15
Market Requirements in Tiered Computing.....	15
Sizing of I/O Traffic in Tiered Computing.....	16
Market Segments by Platforms	16
Product Requirements by Platforms	18
Blade Servers:Storage Requirements	18
Server Blade Interconnect Requirements	18
Blades: “The Key Attribute is Making Data Centers Cost Less”	18
Interconnect for Server, Switch, Storage I/O Blades.....	18
InfiniBand Switch Fabric Advantages	18
Server Management	19
Unique Management requirements for Blade Servers	19

3. Market Sizing & Forecast

WW Server Market Forecast.....	20
WW Server Market Sizing.....	20
WW Servers - 5 year Market Opportunity	20
WW Server Market Sizing by OS	21

WW Server Market By Environment 2005-09	21
WW Server Market By Chip Architecture 2005-09	22
Clustering.....	22
The Growing Market for Clustering.....	22
The Benefits of Cluster Computing Solutions	23
Linux Expertise	23
High Performance.....	23
High Availability	23
Scalability.....	23
Manageability.....	23
Cluster Applications.....	23
Typical Cluster Product Requirements.....	24
Clustering Applications by Vertical Industries.....	25
Exploration Geophysics.....	25
Research & Life Sciences	25
New drugs and medical treatments	26
Human Genome Project	26
Rendering and Entertainment.....	26
Internet and Streaming Media.....	26
Auto and highway safety.....	26
Oil and gas exploration	27
Computational fluid dynamics.....	27
Biotechnology Company Uses ICE Box to Ease Cluster Management	29

4. High Availability Mkt Characterization & Forecast

HA - Industry Drivers	32
Convergence - Telecom and Datacomm Industries.....	32
HA Drivers	32
Major Causes of Downtime	32
Applications Segmented by HA Levels & Performance Metrics.....	33
Achieving High Availability	34
Vendors' Price/Availability Positioning to Achieve High Availability	34
Vendors' Price/Availability Positioning to Achieve High Availability	35
Managing Risk of Downtime	35
High Availability Servers – Market Forecast 2005-09.....	36
HA Servers – Revenues Open & Proprietary Systems 2005-09	36
HA Servers Market by HA Levels	37
HA Servers Mkt Opportunity – Cum Rev vs. Annual Growth 2005-09.....	38
Demand for High Availability Servers	39
High Availability Server Market by HA Levels.....	39

5. HPC Market Characterization & Forecast

HPC Market Forecast	40
HPC Installations by Industry	40
Microprocessors used in HPC Installations	40
HPC Usage by Institution Type	41
Servers Installed Base by Metrics	41

6. Systems Architectures

Architectures – SMP vs Clusters	43
The rise of Blade Computing	44
Doing more with less.....	44
The Convergence Factor: SCSI/FC/InfiniBand/IP.....	44
SNICs – high performance NICs for Storage & Security	47
Product Requirements by Platforms	48
Blade Servers:Storage Requirements	48
Server Blade Interconnect Requirements	48
Blades: “The Key Attribute is Making Data Centers Cost Less”	48
Interconnect for Server, Switch, Storage I/O Blades.....	49
InfiniBand Switch Fabric Advantages	49
Server Management	50
Unique Management requirements for Blade Servers	50
Applications In 3 Tier Computing	51
Clustering.....	52
The Benefits of Cluster Computing Solutions	52
Linux Expertise	52
High Performance.....	52
High Availability	52
Scalability.....	52
Manageability.....	52
Cluster Applications.....	52
Typical Cluster Product Requirements.....	53
Clustering Applications by Vertical Industries.....	53
Exploration Geophysics.....	53
Research & Life Sciences	54
New drugs and medical treatments.....	54
Human Genome Project.....	54
Rendering and Entertainment.....	55
Internet and Streaming Media.....	55
Auto and highway safety.....	55
Oil and gas exploration	55

Computational fluid dynamics.....	55
Biotechnology Company Uses ICE Box to Ease Cluster Management	57
High Availability	59
Database Failure & Recovery Process	60
Scalability.....	61
Scalability on Intel	61
Scalability & Cache Fusion	61
Scalability and Load Balancing	62
Database Availability Requirements	63
Databases – HA Requirements.....	63
Database App Fail-over	64
Oracle Standby Database.....	64
Database Recovery.....	64
Failover Performance	64
Oracle 9i Real application Clusters	65
Clusters Defined	65
Benefits of Real Application Clusters	65
Sharing Data & Memory	65
Real Application Clusters Architecture	65

7. Technologies

Executive Summary	66
Today's Data Center Bottlenecks	66
Current Approaches and Limitations.....	67
Remote Direct Memory Access (RDMA)	68
Evolution of RDMA over TCP/IP Standards.....	69
The Benefits of RDMA over TCP/IP	70
Usage Examples	70
Clustered Databases, Application Servers	70
High Performance Computing	71
Storage Infrastructure	71
Moving Forward – TCP/IP.....	72
IP Storage - Market Issues & Solutions.....	72
iSCSI Market Pyramid.....	72
IP Storage Market Adoption.....	74
Solution: Offload Engines.....	74
Storage Management	75
iSCSI Market Adoption Roadmap	76
iSCSI Milestones.....	76
iSCSI Market Adoption Roadmap.....	77

Future Infrastructure	77
Future Infrastructure	78
Future of iSCSI	78
Key technologies to enhance IP Storage & Network Performance	79
State of Progression of Key Technologies.....	79
IP SAN	79
Status of iSCSI	79
Industry Initiatives	80
Cisco, Network Appliance, qLogic.....	80
Microsoft Initiative - Chimney.....	81
TCP Chimney	81
RDMA Chimney.....	81

8. Interconnects & Storage

Executive Overview.....	82
Doing more with less.....	82
Today's Data Center Bottleneck.....	83
Problems with Existing Protocol Stacks	84
The network I/O is a key bottleneck	84
Rise of Scale-Out Cluster Computing w/ Off-the-Shelf Components.....	86
Rise in Cluster Computers.....	86
Linux Supercomputing moves mainstream	86
System & Storage Fabric Technologies are keys to Clustering	86
Price/Performance - Scale-Up vs. Scale Out Systems	87
3-Tier Computing Infrastructure	88
Tier-1: Web Servers	89
Goal	89
Key problems.....	89
Solutions	89
Tier-2: Application Servers	89
Goal	89
Key problems.....	89
Solution space	89
Tier 3: DB/Transactions.....	89
Key problems.....	89
Solution space	90
Typical Cluster Components	90
Interconnect Contenders	90
Comparison - Interconnect Fabrics	90
Technology Issues	91
Bandwidth	91
Storage	91
Slowly Improving Technologies	91

Latencies	91
WAN latency	92
LAN Latency	92
LAN II	92
Scaling	92
Memory Latency	92
TLB.....	92
Disk latency.....	92
Cache	93
OS latency	93
Heat Transfer.....	93
Laptop chips are not the answer	93
Desktops are not the answer	93
Power Management is not the answer	93
Gut-Wrenching Nightmares	93
Issues - Summary	94
Removing The I/O Bottleneck – Approaches & Limitations	94
TOE	94
Infiniband	94
RDMA	94
How Remote Direct Memory Access (RDMA) Works	95
The Benefits of RDMA	97
Usage Examples	99
Clustered Databases, Application Servers.....	99
The Convergence Factor: SCSI/FC/InfiniBand/IP.....	99
SNICs – high performance NICs for Storage & Security	101
Blade Platforms - Product Requirements	102
Storage Requirements	102
Interconnect Requirements	102
Blades: “The Key Attribute is Making Data Centers Cost Less”	102
Interconnect for Server, Switch, Storage I/O Blades.....	103
InfiniBand Switch Fabric Advantages	103
Blade Server - Key Technologies	103
Key technologies in Computing & Communications Blades.....	103
State of Progression of Key Technologies.....	103
IP SAN	103
Competitive Interconnect Technologies	104
Status of iSCSI	104
Industry Initiatives.....	105
Evolution of RDMA over TCP/IP Standards.....	105
RDMA.....	106
Microsoft’s Chimney Initiative	107
Cisco, Network Appliance, qLogic	107
Microsoft Initiative - Chimney.....	108

TCP Chimney	108
RDMA Chimney	108
Technology Challenges.....	108
Market Acceptance of IP SANs.....	109
Players in Blade Servers by Market Segment	110
Vendors by Technology Segment	110
HPC.....	111
What are High Performance Computing Clusters?	111
Rise of HPC Applications.....	111
HPC History	112
HPC Architecture	112
HPC Building Block.....	113
Software Components	113
Hardware Components.....	114
Network and Server Interconnect.....	114
Management and Monitoring	115
Storage Infrastructure	115
Moving Forward – TCP/IP	115
Networking Technologies.....	116
Evolution of 10 GbE.....	116
Marketplace and technical discontinuities will create unique and compelling opportunities: ..	116
Bandwidth and Functionality	117
Interconnect – Fibre Channel.....	117
Characteristics	117
Status.....	118
Interconnect – InfiniBand	119
Status.....	119
InfiniBand and Industry Standard Servers	119
Characteristics	123
Status.....	123
Opportunities	123
Technology.....	123
Future: Application Aware Infrastructure	125
Application-centric Storage Virtualization.....	125
New Initiator Model: Processes Driven.....	126
Move from 'hardware as initiator' to 'application as initiator'	126
Performance Standards	127
Server Benchmarks	127
Client-System Benchmarks	127
Conclusion on Benchmarks.....	128
Performance – x86 vs. UNIX	128
TeraFlops using Off-the –Shelf Components.....	130
IP Storage - Market Issues & Solutions.....	132
iSCSI Market Pyramid.....	132

IP Storage Market Adoption	133
Solution: Offload Engines	133
Storage Management	135
iSCSI Market Adoption Roadmap	137
iSCSI Milestones	137
iSCSI Market Adoption Roadmap	138
Future of iSCSI	140
Key technologies to enhance IP Storage & Network Performance	140
State of Progression of Key Technologies	140
IP SAN	140
Status of iSCSI	140
Industry Initiatives	141
Future Infrastructure	142
Towards Grid Computing – the Ultimate Goal	144
Oracle Grid Computing	144
Price/Performance – Grid Computing	145
Advantages of Grids	145
High Availability	146
Manage Groups as One	146

9. Software

HPC Software	148
ATLAS — Automatically Tuned Linear Algebra Software	148
distcc — a fast, free distributed C/C++ Compiler	148
Fedora Project Core 2 — Operating System Sponsored by Red Hat	148
FFTW — "Fastest Fourier Transform in the West"	148
GCC — GNU Compiler Collection	148
HPL — Portable Implementation of High Perf. Linpack Benchmark	149
mpiBLAST — Open Source Parallel BLAST	149
MPICH2 — A Portable Implementation of MPI	149
PVFS2 — Parallel Virtual File System, Version 2	149
SGE — Sun Grid Engine	149

10. Suppliers

Suppliers	150
AMD	150
Angstrom Microsystems	150
Bull	150
ClearSpeed	151
Cray Inc.	151
Dell Computer Corporation	151
Fujitsu Siemens Computers	151

Hewlett-Packard	152
IBM	152
Intel	152
Megware Computer	152
Melrow Technology	153
NEC High Performance Computing Europe	153
SGI	153
Visual Technology Inc.....	155
HPC Implementors	158
Hungarian Academy of Sciences	161
MS High-Performance Computing Partners	163
Independent Software Vendors	163
Original Equipment Manufacturers	171
General Vendors.....	175
Absoft.....	177
AcceleratedServers	177
Advanced Clustering Technologies	177
Alinka	177
Altair Engineering (UK).....	177
APPRO	177
Atipa Technologies	177
Aspen Systems Inc.....	177
Blue Sail Software	177
Cepoint Networks, LLC.....	177
Cluster Resources, Inc.	178
ClusterVision (Neth/UK)	178
Compusys Plc. (UK)	178
Concentric Systems, Inc.	178
Craig's Planet Ltd	178
Critical Software SA.....	178
Engineered Intelligence	178
Evidian (France)	178
Googgun Technologies, Inc.....	178
Gridcore AB (Sweden).....	178
IBM - Linux Clusters	179
I-Tech Company Rackmount Systems.....	179
Linux Labs	179
Linux Networx	179
Microway.....	179
Micro Pc/Galfer (Italy).....	179
Mosix	179
Mountain View Data.....	180
MPI Software Technology	180
Myricom	180
NAG - Numerical Algorithms Group	180
Open Clustering.....	180
Paralogic.....	180
Penguin Computing Inc.	180
Petal Computing	180
Platform	180
Pogo Linux.....	180
Promicro Systems.....	180
PSSC Labs	181

Quadrics	181
Quant-X-EDV Service & Consulting GmbH (Austria)	181
RackmountMart.com	181
RLX Technologies	181
Scalable Informatics LLC	181
SCALI	181
Scyld Computing Corporation	181
ShaoLin Microsystems Ltd.	181
Sistina	181
Smart Modular Technologies, Inc.	182
Stalker Software Inc.	182
SteelEye Technology Inc.	182
Streamline Computing (UK)	182
SW Technology	182
Sysix Technology	182
TeamHPC, Inc.	182
TeraPort (Spain)	182
Terra Soft Solutions	182
Verari Systems	182
Viglen (UK)	182
Whizlabs Software (India)	183
Western Scientific, Inc.	183
HPC Resellers	183
North America	183
Supplier Profiles	189
NEC	189
Products	189
High Performance High Reliability Server	189
NEC HPC Linux Cluster	191
IA 64 Server / Linux Applications	192
